

## Learn English playing chess

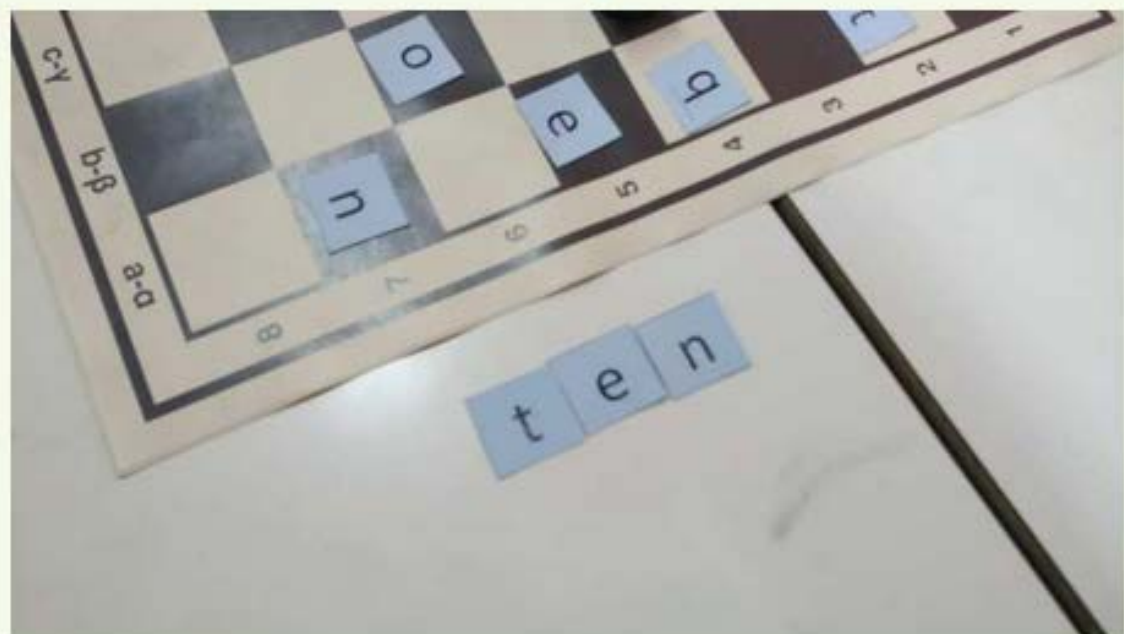

Two players (or two teams of two students) play having one rocket each (or a bishop, a knight, a queen or a king). The goal is for every player or team to collect letters which are on the chess board. The player that will manage to form a word with the letter he has collected is the winner of the game.

There are two Variants (the chess pieces can or can not get caught each other).

## Learn math playing chess

The purpose of the game is the knight (the bishop, queen, etc.) to collect numbers, (the pairs of 10, or the circumstantial numbers, or the multiple of 3 etc).

Example

Learning the knight's moves through math games.
